Reasons for Allowance

The information regarding the cultivar Kiefudimi was described in the Plant Breeder's

Right application number 02-3246 filed in Canada on September 4, 2002 and published on

October 31, 2002. The printed publication was accessible to the public more than one year

prior to filing of this instant application. A publication relied upon as prior art under 35 USC

102(b) must be enabling. The text of the relied upon publications standing alone would not

enable one skilled in the art to practice the claimed invention.

When the claim is drawn to a plant, the reference, combined with knowledge in the prior

art, must enable one of ordinary skill in the art to obtain or reproduce the plant. See In re Le

Grice, 301 F.2d 929, 133 USPQ 365 (CCPA 1962). If one skilled in the art could obtain and

reproduce the plant from a publicly available source, then a publication describing the plant

would have an enabling disclosure.

In the declaration, Applicant states the claimed plant has not been sold or available to

the public anywhere in the world. The printed publication cannot be enabled because the

disclosed cultivar has not been propagated or obtained from publicly available materials.

The specification provides as complete a botanical description as reasonably possible of

the claimed plant. The completeness of the description is sufficient to distinguish this new plant

from the prior art.
